British Medium Stella Upton MSNU

The Journey Within 973-616-9685
Friday, March 16th, 2018 7:30 - 9pm \$35

“The pathway of a professional medium requires a background of spiritual knowledge and mediumistic experience. It is essential to learn of the many different scenarios you may find yourself in, and to decide what field of mediumship you may be able to work in professionally.

The changing over, from any previous profession, needs to be seriously considered. Financial implications are imperative, and are not always thought through properly.

If you already work as a professional in this field we will discuss how to bring about positive changes within this work, and how to enhance the potential you have to move forwards.”

Stella Upton, MSNU has been aware of the spirit world since being a small child. When very young she thought her mother had many visitors to the house, and only later realized these ‘visitors’ were actually spirits. She was then certain of life after death. At age 14 Stella began to develop her mediumship. She spent several years in church development groups and attended the Arthur Findlay College for eight years, becoming a tutor there in 1998. Since taking her first church service in 1990, she regularly does mediumship demonstrations, and private sittings. A more recent development is the painting of auragraphs. Along with teaching at the Arthur Findlay College, Stella has also worked with students throughout the UK and abroad, teaching relaxation, meditation, awareness, color, spirit art, paranormal phenomena and evidential mediumship. \$100.00 non-refundable deposit due upon registration.
